

Artisan FlexGel Nail Enhancement System – Product Instructions

FlexGel Natural Nail Application

You will need:

Artisan Equalizer
Artisan Primex Acid-Free Primer
Artisan FlexGel Dual-Sided Brush
Artisan FlexGel Smoother Solution
Artisan FlexGel (color of choice)
LED Gel Lamp
Optional: Artisan Acrylic Nail Forms for longer nails

FlexGel Reusable Tip Mold Application

You will need:

Above items, and also:
Artisan FlexGel Multi-Purpose Spatula
Artisan FlexGel Reusable Tip Molds
Artisan FlexGel True White (for pink & whites)

FlexGel Natural Nail Application

1. Prep nails. Squeeze a small amount of FlexGel on natural nails.
2. Dip brush in Artisan FlexGel Smoother Solution and sculpt the gel onto nails.
OPTIONAL: Use Artisan Acrylic Nail Forms to create longer nails.
3. Take your time to sculpt. FlexGel will never dry until it's cured under an LED lamp.
4. Cure nails under LED Lamp for 60 seconds.
5. File, shape, and buff nails lightly.

FlexGel Reusable Tip Mold Application – One Color

1. Prep the nails and pick the size of the Artisan FlexGel Reusable Molds.
2. Squeeze a small amount of Artisan FlexGel color on the well of the mold. Use Artisan FlexGel Multi-Purpose Spatula to spread gel evenly.
3. Apply the mold carefully, and press on the mold gently, but firmly. Make sure no air bubbles form between the gel and the mold. While holding mold, use brush with Artisan FlexGel Smoother Solution to wipe away any excess gel around and under the mold.
4. Cure the nail under LED Lamp for 60 seconds. Cure under the nail for 30 seconds.
5. Remove mold by pulling back sideways from the tip of the mold.
IMPORTANT: Follow step #2 to #6 for each nail individually.
6. File and shape the nails. Top surface will already be smooth and shiny. Only light buffing is needed if applying polish.

FlexGel Reusable Tip Mold Application – Pink & Whites

1. Prep the nails and pick the size of the Artisan FlexGel Reusable Molds.
2. Match client's smile line to the mold.
3. Squeeze a small size amount of Artisan FlexGel True White on the inside free edge side of the mold. Use Artisan FlexGel Dual-Sided Brush with Smoother Solution to sculpt smile line.
4. Next, apply pink Artisan FlexGel on the well of the mold. Use Artisan FlexGel Multi-Purpose Spatula to spread gel evenly. Shape pink color using FlexGel Dual-Sided Brush with Smoother Solution.
7. Apply the mold carefully, and press on the mold gently, but firmly. Make sure no air bubbles form between the gel and the mold. While holding mold, use brush with Artisan FlexGel Smoother Solution to wipe away any excess gel around and under the mold.
8. Cure the nail under LED Lamp for 60 seconds. Cure under the nail for 30 seconds.
9. Remove mold by pulling back sideways from the tip of the mold.
IMPORTANT: Follow step #2 to #6 for each nail individually.
10. File and shape the nails. Top surface will already be smooth and shiny. Only light buffing is needed if applying polish.
