1. PRODUCT IDENTIFICATION

1.1 Product Name: SCRUBFRESH
1.2 Chemical Name: SOLVENT SOLUTION
1.3 Synonyms:
1.4 Trade Names:
1.5 Product Use: PROFESSIONAL OR SUNDRY USE ONLY
1.6 Manufacturer’s Name: CREATIVE NAIL DESIGN, INC.
1.7 Manufacturer’s Address: 1125 JOSHUA WAY, VISTA, CA  92083
1.8 Emergency Phone: ROCKY MOUNTAIN POISON CONTROL CENTER: 1-303-623-5716
1.9 Business Phone: 1-800-833-NAIL (6245)

3.3 Effects of Exposure:

INGESTION: If product is swallowed, may cause nausea, vomiting and/or diarrhea and central nervous system depression.

EYES & SKIN: The liquid may produce eye discomfort and is capable of causing temporary impairment of vision and/or transient eye inflammation, ulceration. The vapor is discomforting to the eye. Splashes may cause severe eye irritation, possible corneal burns and eye damage. Moderately irritating to the eyes. Symptoms of overexposure may include redness, itching, irritation and watering. May be irritating to skin, especially after prolonged contact. The product can cause allergic skin reactions (e.g., rashes, welts, dermatitis) upon prolonged or repeated exposure.

INHALATION: Vapors of this product may be moderately irritating to the nose, throat and other tissues of the respiratory system. Symptoms of overexposure can include coughing, wheezing, nasal congestion, and difficulty breathing. Inhalation of concentrated vapors can cause central nervous system depression (e.g., drowsiness, dizziness, headaches, nausea). Odor may give some warning of exposure, but odor fatigue may occur.

3.4 Symptoms of Overexposure:

Symptoms of skin overexposure may include redness, itching, and irritation of affected areas. Overexposure in eyes may cause redness, itching and watering. The product can cause allergic skin reactions (e.g., rashes, welts, dermatitis) upon prolonged or repeated exposure.

3.5 Acute Health Effects:

Moderate irritation to eyes and skin near affected areas. Additionally, high concentrations of vapors can cause drowsiness, dizziness, headaches and nausea.

3.6 Chronic Health Effects:

The material may accentuate any pre-existing dermatitis condition. None known

3.7 Target Organ(s):

Eyes, skin & respiratory system.

4. FIRST AID MEASURES

4.1 First Aid:

INGESTION: If ingested, do not induce vomiting! If product has been swallowed, drink plenty of water or milk IMMEDIATELY. If the patient is vomiting, continue to offer water or milk. Never give water or milk to an unconscious person. Contact Rocky Mountain Poison Control Center at 1-303-623-5716 or the nearest Poison Control Center or local emergency number. Provide an estimate of the time at which the material was ingested and the amount of the substance that was swallowed.

SKIN & EYES: If product gets in the eyes, flush with copious amounts of lukewarm water for at least 15 minutes. Open and close eyelid(s) to ensure thorough irrigation. Seek immediate medical attention. If problem persists, seek immediate medical attention. If irritation occurs & product is on the skin, rinse thoroughly with lukewarm water, followed by a thorough washing of the affected area with plenty of soap and water. Remove all contaminated clothing, including footgear and wash thoroughly before reuse. If irritation, redness or swelling persists, consult a physician immediately.

INHALATION: Remove victim to fresh air at once. If breathing stops, perform artificial respiration. Seek immediate medical attention.

4.2 Medical Conditions Aggravated by Exposure:

Pre-existing dermatitis, other skin conditions, and disorders of the target organs (eyes, skin, respiratory system).
5. FIREFIGHTING MEASURES

5.1 Flashpoint & Method: 
-4°C (25°F)

5.2 Autoignition Temperature: 
ND

5.3 Flammability Limits: 
Lower Explosive Limit (LEL): ND
Upper Explosive Limit (UEL): ND

5.4 Fire & Explosion Hazards: 
This product is an extremely flammable liquid. When involved in a fire, this product may ignite and decompose to form toxic gases (e.g., CO, CO2, NOx).

5.5 Extinguishing Methods: 
Water, Foam, CO2, Dry Chemical

5.6 Firefighting Procedures: 
First responders should wear eye protection. Structural fire fighters must wear full protective equipment and MSHA/NIOSH-approved self-contained breathing apparatus. If possible, prevent runoff water from entering storm drains, bodies of water, or other environmentally sensitive areas. If necessary, rinse contaminated equipment with soapy water before returning to service.

6. ACCIDENTAL RELEASE MEASURES

6.1 Spills: 
Before cleaning any spill or leak, individuals involved in spill cleanup must wear appropriate Personal Protective Equipment. For small spills (e.g., <1 gallon) wear appropriate personal protective equipment (e.g., goggles, gloves). Maximize ventilation (open doors and windows) and secure all sources of ignition. Remove spilled material with absorbent material and place into appropriate closed container(s) for disposal. Dispose of properly in accordance with local, state and federal regulations. Wash all affected areas and outside of container with plenty of warm water and soap. Remove any contaminated clothing and wash thoroughly before reuse.

For spills ≥ 1 gallon, deny entry to all unprotected individuals. Dike and contain spill with inert material (e.g., sand or earth). Use ONLY non-sparking tools for recovery and cleanup. Transfer liquid to containers for recovery or disposal and solid diking material to separate containers for proper disposal. Remove contaminated clothing promptly and wash affected skin areas with soap and water. Keep spills and cleaning runoffs out of municipal sewers and open bodies of water.

7. HANDLING & STORAGE INFORMATION

7.1 Work & Hygiene Practices: 
Avoid prolonged contact with this material. Avoid breathing the vapors generated by this product. Use in a well-ventilated location (e.g., local exhaust ventilation, fans). Wash exposed skin thoroughly with plenty of soap & water after using this product. If necessary, use a moisturizer after washing. Do not eat, drink, or smoke while handling this product.

7.2 Storage & Handling: 
Use and store in a cool, dry, well-ventilated location (e.g., local exhaust ventilation, fans). Keep away from excessive heat, open flames, sparks, and other possible sources of ignition. Keep away from incompatible materials listed in Section 10. Do not store in damaged or unmarked containers or storage devices. Keep containers securely closed when not in use. Open slowly on a level, stable surface. Empty containers may contain residual amounts of this product; therefore, empty containers should be handled with care. As a precaution against exposure to the eyes, nose, throat and face, this product should not be stored higher than waist level. Keep away from children at all times!

7.3 Special Precautions: 
None.

8. EXPOSURE CONTROLS & PERSONAL PROTECTION

8.1 Ventilation & Engineering Controls: 
Use with adequate ventilation (e.g., local exhaust ventilation, fans). Ensure appropriate decontamination equipment is available (e.g., sink, safety shower, eye-wash station).

8.2 Respiratory Protection: 
No special respiratory protection is required under typical circumstances of use or handling. In instances where vapors or sprays of this product are generated, and respiratory protection is needed, use only protection authorized by 29 CFR §1910.134, applicable U.S. State regulations, or the Canadian CAS Standard Z94.4-93 and applicable standards of Canadian Provinces, EC member States, or Australia.

8.3 Eye Protection: 
Wear protective eyewear (e.g., safety glasses with side-shield) at all times when handling this product. Always use protective eyewear when cleaning spills or leaks. Contact lenses pose a special hazard; soft lenses may absorb and concentrate irritants.
8.4 Hand Protection: None required under normal conditions of use. However, may cause skin irritation in some sensitive individuals. When handling large quantities (e.g., ≥ 1 gallon), wear rubber or plastic impervious gloves.

8.5 Body Protection: No apron required when handling small quantities. When handling large quantities (e.g., ≥ 1 gallon), eye wash stations and deluge showers should be available. Upon completion of work activities involving large quantities of this product, wash any exposed areas thoroughly with soap and water.

12. ECOLOGICAL INFORMATION

12.1 Environmental Stability: This product will slowly volatile from soil. Components of this product will slowly decompose into organic compounds.

12.2 Effects on Plants & Animals: There is no specific data available for this product.

12.3 Effects on Aquatic Life: There is no specific data available for this product. Releases of large volumes may be harmful or fatal to overexposed aquatic life. Aquatic toxicity data for components of this product are available, but are not presented in this MSDS.

13. DISPOSAL CONSIDERATIONS

13.1 Waste Disposal: Dispose in accordance with local, state and Federal hazardous waste laws.

13.2 Special Considerations:
U.S. EPA Characteristic Waste: D001 (flammable)

14. TRANSPORTATION INFORMATION

The basic description (proper shipping name, hazard class & division, ID Number, packing group) is shown for each mode of transportation. Additional descriptive information may be required by 49 CFR, IATA/ICAO, IMDG and the CTDGR.

14.1 49 CFR (GND):
CONSUMER COMMODITY, ORM-D
FLAMMABLE LIQUID, N.O.S. (acetone, isopropanol), 3, UN1993, II (> 1.0 L)

14.2 IATA (AIR):
CONSUMER COMMODITY, ORM-D (≤ 0.5 L)
FLAMMABLE LIQUID, N.O.S. (acetone, isopropanol), 3, UN1993, II (> 0.5 L)

14.3 IMDG (OCN):
FLAMMABLE LIQUID, N.O.S. (acetone, isopropanol), 3, UN1993, II, LTD QTY (≤ 1.0 L)
FLAMMABLE LIQUID, N.O.S. (acetone, isopropanol), 3, UN1993, II (> 1.0 L)

14.4 TDGR (Canadian GND):
MARK PACKAGE “LIMITED QUANTITY” or “QUANTITÉ LIMITÉE” or “LTD QTY” or “QUANT LTÉE” (≤ 1.0 L)
FLAMMABLE LIQUID, N.O.S. (acetone, isopropanol), 3, UN1993, II (> 1.0 L)

15. REGULATORY INFORMATION

15.1 SARA Reporting Requirements:
SARA 313 (Isopropanol)

15.2 SARA Threshold Planning Quantity:
Not applicable.

15.3 TSCA Inventory Status:
All components of this product are listed in the TSCA Inventory or are exempt.

15.4 CERCLA Reportable Quantity (RQ):
Acetone = 5000 pounds; Butyl Acetate = 5000 pounds.

15.5 Other Federal Requirements:
NA

15.6 Other Canadian Regulations:
This product has been classified according to the hazard criteria of the CPR and the MSDS contains all of the information required by the CPR. The components of this product are listed on the DSL/NDSL. None of the components of this product are listed on the Priorities Substances List. Class B2 Flammable Liquid.

15.7 State Regulatory Information:
Acetone, Isopropanol and n-Butyl Acetate are covered under specific state criteria. No component of this mixture is listed in the California Proposition 65 Lists.
16. OTHER INFORMATION

16.1 Other Information:
Precisely follow directions and MSDS (available through your supplier) for use. EXTREMELY FLAMMABLE! Poisonous if swallowed! KEEP OUT OF REACH OF CHILDREN. If redness or other signs of adverse reaction occur, discontinue use immediately.

16.2 Terms & Definitions:
See page 7 of this MSDS.

16.3 Disclaimer:
This Material Safety Data Sheet is offered pursuant to OSHA’s Hazard Communication Standard, 29 CFR §1910.1200. Other government regulations must be reviewed for applicability to this product. To the best of ShipMate’s & Creative Nail Design's knowledge, the information contained herein is reliable and accurate as of this date; however, accuracy, suitability or completeness are not guaranteed and no warranties of any type, either expressed or implied, are provided. The information contained herein relates only to the specific product(s). If this product(s) is combined with other materials, all component properties must be considered. Data may be changed from time to time. Be sure to consult the latest edition.

DEFINITIONS OF TERMS

A large number of abbreviations and acronyms appear on a MSDS. Some of these which are commonly used include the following:

- **CAS #:** This is the Chemical Abstract Service Number which uniquely identifies each constituent.

- **EXPOSURE LIMITS IN AIR:**
  - ACGIH – The American Conference on Governmental Industrial Hygienists, a professional association which establishes exposure limits.
  - TLV – Threshold Limit Value – an airborne concentration of a substance which represents conditions under which it is generally believed that all workers may be repeatedly exposed without adverse effect. The duration must be considered, including the 8-hour Time Weighted Average (TWA), the 15-minute Short Term Exposure Limit, and the instantaneous Ceiling Level (C). Skin absorption effect must also be considered.

- **OSHA – U.S. Occupational Safety and Health Administration**
  - PEL – Permissible Exposure Limit – This exposure value means exactly the same as TLV, except that it is enforceable by OSHA. The OSHA Permissible Exposure Limits are based in the 1989 PELs and the June 1993 Air Contaminants Rule (Federal Register: 58: 35538-35531 and 58: 40191). Both the current PELs and the vacated PELs are indicated. The phrase “Vacated 1989 PEL” is placed next to the PEL which was vacated by Court Order.

- **IDLH – Immediately Dangerous to Life and Health** – This level represents a concentration from which one can escape within 30-minutes without suffering escape-preventing or permanent injury. The DFG – MAK is the Republic of Germany’s Maximum Exposure Level, similar to the U.S. PEL. NIOSH is the National Institute of Occupational Safety and Health, which is the research arm of the U.S. Occupational Safety and Health Administration (OSHA). NIOSH issues exposure guidelines called Recommended Exposure Levels (RELs) When no exposure guidelines are established, an entry of NE is made for reference.

- **FIRST AID MEASURES:**
  - CPR: Cardiopulmonary resuscitation. Method in which a person whose heart has stopped receives manual chest compressions and breathing to circulate blood and provide oxygen to the body.

- **HAZARD RATINGS:**
  - **HAZARDOUS MATERIALS IDENTIFICATION SYSTEM:** This rating system was developed by the National Paint and Coating Association and has been adopted by industry to identify the degree of chemical hazards. Health Hazard: 0 (minimal acute or chronic exposure hazard); 1 (slight acute or chronic exposure hazard); 2 (moderate acute or significant chronic exposure hazard); 3 (severe acute exposure hazard; onet ime overexposure can result in permanent injury and may be fatal); 4 (extreme acute exposure hazard; onetime overexposure can be fatal). Flammability hazard: 0 (minimal hazard); 1 (materials that require substantial pre-heating before burning); 2 (combustible liquids or solids; liquids with a flashpoint of 38-93°C [100-200°F]); 3 (Class 1B and 1C flammable liquids with flash points below 38°C [100°F]; 4 (Class 1A flammable liquids with flash points below 23°C [73°F] and boiling points below 38°C [100°F], Reactivity Hazard: 0 (normally stable); 1 (materials that can become unstable at elevated temperatures or which can react slightly with water); 2 (materials that are unstable but do not detonate when initiated or which can react violently with water); 3 (materials that can detonate when initiated or which can react explosively with water); 4 (materials that can detonate at normal temperatures or pressures). 

- **NATIONAL FIRE PROTECTION ASSOCIATION:** Health Hazard: 0 (material that on exposure under fire conditions would offer no hazard beyond that of ordinary combustible materials); 1 (materials that on exposure under fire conditions could cause irritation or minor residual injury); 2 (materials that on intense or continued exposure under fire conditions could cause temporary incapacitation or possible residual injury); 3 (materials that on short exposure could cause serious temporary or residual injury); 4 (material that under very short exposure could cause death or major residual injury). Reactivity Hazard: 0 (material that on exposure under fire conditions, or accidental exposure, is unlikely to cause reactions or significant effects). Reactivity Hazard: 1 (material that on exposure under fire conditions, or accidental exposure, can cause reactions or significant effects, but which can be mitigated by fire-fighting procedures). Reactivity Hazard: 2 (material that on exposure under fire conditions, or accidental exposure, can cause reactions or significant effects, and which cannot be mitigated by fire-fighting procedures). Reactivity Hazard: 3 (material that on exposure under fire conditions, or accidental exposure, can cause reactions or significant effects, and which cannot be mitigated by fire-fighting procedures, and which, if ignited, would cause significant effects).

- **DEPARTMENT OF TRANSPORTATION:**DOT: The U.S. Department of Transportation (DOT) and the U.S. Department of Transportation and the Transport Canada, respectively. Superfund Amendments and Reauthorization Act (SARA); the Canadian Domestic/Non-Domestic Substance List (DSL/NDSL); the U.S. Toxic Substance Control Act (TSCA); Marine Pollutant status according to the DOT; the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA or Superfund); and various state regulations. This section also includes information on the precautionary warnings which appear on the material’s package label.
